StarLine® i96 CAN

SMART CAR IMMOBILIZER

SMART SECURITY

INVISIBLE ENGINE BLOCKING

Unique patented iCAN technology guarantees reliable protection by hidden engine blocking through a factory digital CAN or LIN bus. The engine will be shut down immediately after the motion start.

ADDITIONAL ENGINE BLOCKING

Standard car relay, waterproof wireless StarLine R6 relay module or digital StarLine R4 relay module provides reliable protection against hijacking by analogue engine cut and hood lock control.

BLUETOOTH SMART AUTHORIZATION

To start driving owner should pass authorization by a small waterproof wireless tag or smartphone with StarLine Key App (available for iOS and Android smartphones with Bluetooth 4.2 version and above).

PIN-CODE AUTHORIZATION

Additional authorization provides reliable protection against hijacking, enhancing security functions of factory car alarm. Trip is allowed only after entering an individual PIN-code with car original buttons.

SUPER SLAVE

Control over car OEM alarm and central lock with with StarLine wireless tag or smartphone with StarLine App.

KEYLESS ACCESS PROTECTION

StarLine intelligent protection will block unauthorized attempts to disarm factory security and open car by hacking original keyless access system.

OBD-II PROTECTION

Immobilizer protects diagnostic socket by CAN-bus interruption in armed mode to avoid unauthorized access to OBD-II in order to disable CAN blocking or register the extra car keys.

MOTION DETECTION

StarLine will block an engine by motion detection if owner did not pass authorization. This function allows correct remote engine start without security disarming.

HANDS-FREE MODE

StarLine will automatically disarm security and unlock doors when owner approaches to a car having StarLine wireless tag or smartphone and lock a car when owner is away.

CONVENIENT SERVICE
