StarLine® M15 ECO

Telematics

Telematic service provides simple and convenient settings, quick start and automatic software update

Record energy efficiency

Patented progressive technologies and program solutions claim economic energy consumption.

Hypersensitivity

GPS-GLONASS antenna provides hypersensitivity and an almost instant and precise location detection even under the most severe conditions

A hijacker's true nightmare

StarLine M15 can be easily hidden in the most unexpected locations, both on the inner and outer side of the vehicles or motorboats due to waterproof case and the microphone's nanomembrane

Intelligence

Powerful ARM processor allows to implement elements of artificial intelligence: automatic setting of time and internet connection parameters, automatic balance control and low balance notification
